Overview of Information Required for an
AVS Gaede-Langmuir Nomination

The AVS Award nominations are submitted using a web based system that can be found at: https://avs.awardsplatform.com/. The required information and nomination questions for a **Gaede-Langmuir Award** nomination are listed below to enable the nomination material to be assembled offline in preparation to entry into the web system.

Tips on How to Craft an Effective Nomination and Strong Support Letters

The online forms serve as a guide to the type and amount of information the Award Committee needs to see to evaluate nominees. However, each nominee has their own story and impact. It is the challenge of the nominators to tell the critical story within the context of the questions and nomination sections described for each award. It is useful to tell the story, not just present a bunch of facts. Tell about the impact: help the Award Committee to know the candidate, his/her accomplishments, and his/her impact. Purpose

To recognize and encourage outstanding discoveries and inventions in the sciences and technologies of interest to AVS.

Eligibility

A nominee must have made a major contribution to the sciences and technologies of interest to AVS. The contribution may be in the nature of a new invention, process or discovery; this shall include significant advances in theory, the discovery of a new effect, phenomenon or process, or the invention of a novel device, instrument, technique or measurement.

In any given year an individual may provide a nominating or supporting letter for only one candidate for each award. The award will be granted without further restriction except that current members of the Board of Directors and the Awards Committee are not eligible. Further, no member of the Awards Committee may nominate or support any nomination. The AVS Awards Committee reserves the right to consider a candidate for a different award category.
